New England Biolabs Certificate of Analysis

Product Name:	Amylose Magnetic Beads
Catalog Number:	E8035S
Concentration:	10 mg/ml
Packaging Lot Number:	10062558
Expiration Date:	01/2023
Storage Temperature:	4°C
Storage Conditions:	20% Ethanol
Specification Version:	PS-E8035S v1.0

Amylose Magnetic Beads Component List				
NEB Part Number	Component Description	Lot Number	Individual QC Result	
E8035SVIAL	Amylose Magnetic Beads	10062557	Pass	

Assay Name/Specification	Lot # 10062558
Binding Capacity (Magnetic Beads) Amylose Magnetic Beads (1 mg) were equilibrated and incubated with 500 μ l of crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin Δ Sal fusion protein for 2 hours at 25°C, then washed and the MBP5*-paramyosin Δ Sal fusion protein eluted. Binding capacity was determined to be >10 μ g of target protein per mg of beads.	Pass
Functional Binding Assay (Qualitative) Amylose Magnetic Beads (1 mg) were equilibrated and incubated with 500 µl of crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin∆Sal fusion protein for 2 hours at 25°C, then washed, eluted and evaluated by SDS-PAGE to confirm low non-specific binding of extract proteins and high isolation of target.	Pass

This product has been tested and shown to be in compliance with all specifications.
